

# Financing and Legal Framework in North Tallinn

Thematic seminar Tallinn November 2011

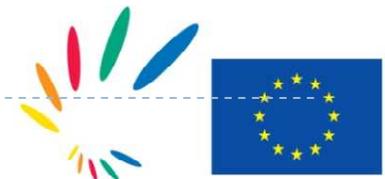

## Preparing for emergency is risk mitigation

---

- 1) Emergency risk assessment
  - Regulation no 5 of Minister of Interior 18.02.2010
- 2) Emergency plan
  - Guidelines for preparing emergency plans by the regulation no 15 of the Minister of Interior 08.06.2010
- 3) Exercises
  - Consist of headquarters and field exercises carried out on state, regional and municipal level

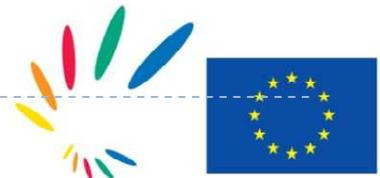

## Basics for creating the plan

---

- Government has listed the emergencies that require the emergency plans and has appointed the state agencies to prepare these plans
- State agencies and other juridical bodies who will have an important information or who are participating in the processes of responding to emergencies are appointed by the Government to be included to the planning process

## Emergency Plan (EP)

---

- EP is a document that describes on a state or if necessary on a regional or municipal level:
  - 1) Arrangement of responding to emergencies (ES)
  - 2) Management structure of responding to ES
  - 3) Responsibilities of agencies and individuals participating in ES
  - 4) Regulation of exchange of information between the agencies and individuals participating in ES
  - 5) Arrangement of informing the public of ES
  - 6) Organizing international co-operation in ES
  - 7) Other questions involved in ES

## Informing of emergency

---

The regulation no 57 “Informing Ministry of Interior in case of emergency or risk of emergency” of the Government from 06.05.2010

- It is compulsory for any office or legal body to inform the Ministry of Interior immediately of emergency or risk of emergency occurred in area of activities

The regulation no 92 “Requirements on informing the public of the risk of the occurrence of emergency, emergency and the response to emergency” of the Government from 01.07.2010

- The public has to be informed immediately in case of risk of occurrence of emergency, of emergency or response to emergency if the failure to inform may endanger the lives or health of people, cause major proprietary damage or otherwise disrupt the ordinary way of life

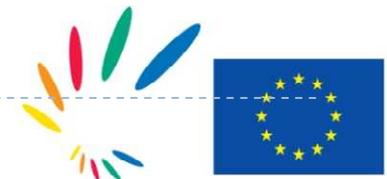

## Risk mitigation measures and budget

---

In North Tallinn the risk mitigation measures are mainly:

1. Cleaning the coastal areas and the Natura 2000 area from the rubbish - € 30,000 in 2011
2. Cleaning the streets from the snow in the winter - € 100,000 in 2011

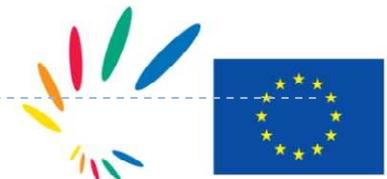

## Risk mitigation in private sector

---

On municipal level there is no PPP because of legislation – PPP in Estonia is considered as a loan for municipality – this is a problem in legislation

1. Tallina Vesi is taking care of water supply, waste water and floods according to regulations.
2. Private companies in North Tallinn are transporting and storing chemicals according to the Law of chemicals. Environmental inspection is responsible for inspection.

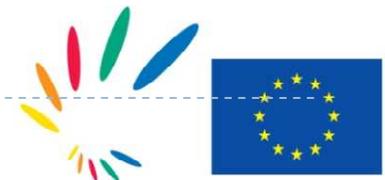

## Risk mitigation in other institutions

---

All the other institutions are also dealing with risk mitigation – Environmental department is asking for funds to clean the roadways in Paljassaare Peninsula for example.
